

ATTACHMENT A Amendments to the Claims

Following herewith is a complete listing of the claims, including a marked copy of the currently amended claims.

- Sub
P1
C1*
1. (Currently Amended) A method of preparing a trace element solution, ~~which comprises said method consisting essentially of the steps of:~~
- (a) ~~preparing a single solution comprising more than one EDTA-complex as a sodium salt in a single continuous process by using one selected from the group consisting of suspending either disodium EDTA and in water or suspending EDTA acid in water with sodium hydroxide, and adding a metal compound to the EDTA solution to form the EDTA-complex; and~~
 - (b) ~~providing a adding sodium selenite to the solution of EDTA-complexes to form the trace element solution; and~~
 - (c) ~~combining the EDTA complexes and the sodium selenite solution.~~

Claim 2 (Previously Cancelled)

Claims 3-4 (Cancelled)

5. (Currently Amended) A method as claimed in claim 1, in which the ~~EDTA-~~
~~complexes are prepared by using at least one metal compound~~ is selected from the
group consisting of metal oxides, metal hydroxides and metal carbonates.

6. (Currently Amended) A method as claimed in claim 1, in which the EDTA-
complexes comprise at least one of the metal compounds cation components selected
from the group consisting of copper, manganese, zinc, molybdenum and chromium.

7. (Original) A trace element solution as prepared by a method as claimed in
claim 1.

Claim 8 (Cancelled)

9. (Currently Amended) A trace element solution as claimed in claim-~~8~~ 7,
which is an injectable solution.

10. (Currently Amended) A trace element solution as claimed in claim-~~8~~ 7,
which is a drenchable solution.

11. (Currently Amended) A stock lick, which comprises a trace element solution as prepared by a method as claimed in claim 1.

~~(a) more than one EDTA complex as a sodium salt prepared in a single continuous process by using disodium EDTA or EDTA acid with sodium hydroxide; and~~

~~(b) selenium selenite.~~

12. (Previously Amended) A method of providing trace elements to animals, such as livestock, which comprises the steps of preparing a trace element solution as claimed in claim 1, and of providing the solution in a suitable quantity to an animal.

13. (New) A method as claimed in claim 1, in which the molar ratio of selenium in the form of sodium selenite to the metal compounds to the EDTA complexes varies between 1:4.8:4.8 and 1:19:19.
